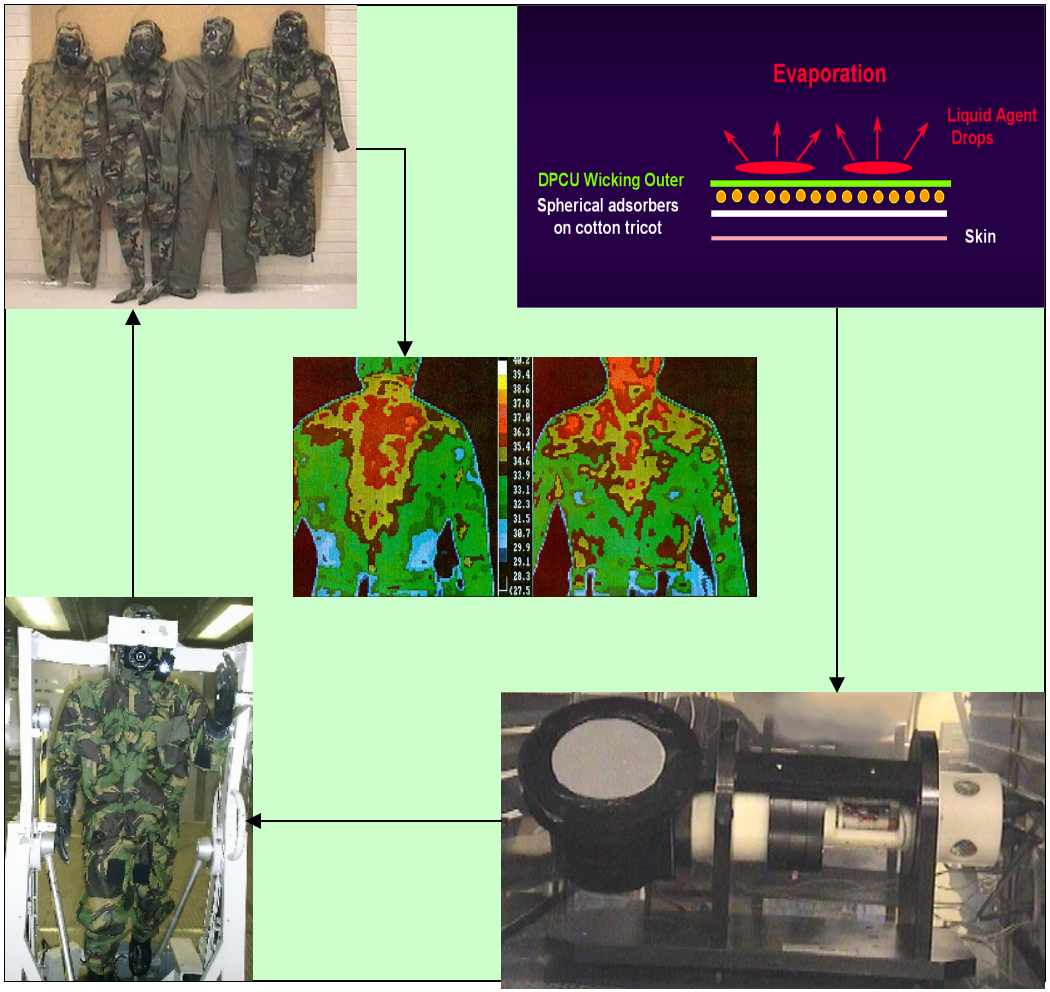
Protection vs Burden: A Quadripartite Study into the Balance Between Physiological Burden and CB Protective Performance of Each Nation's Most Advanced Suit System
CBD TP 11 and HUM TP 6



Developmental and testing cycle of the low burden CB suits.

Objective: Evaluate the protective and physiological performance of four developmental low burden CB suits

Achievements:

- **AS IRR deployed the unit with CBCS suits.**
- **The CF has acquired 5000 suits using the fabrici n this study**
- **UK MoD instigated a user trial on MKV**

Future Activities:

- **Advance aerosol protection**
- **Flame-retardency**
- **Selective membrane technology**
- ***Building Block for Future Developments***
